

Complete the following steps to install Apps on your Ledger Nano S. Depending on which apps you install, you can have 4 to 10 on the device at any one time. In this example, we will install the Bitcoin and Ethereum apps.

1. Find Bitcoin from the list and click on “Install”.

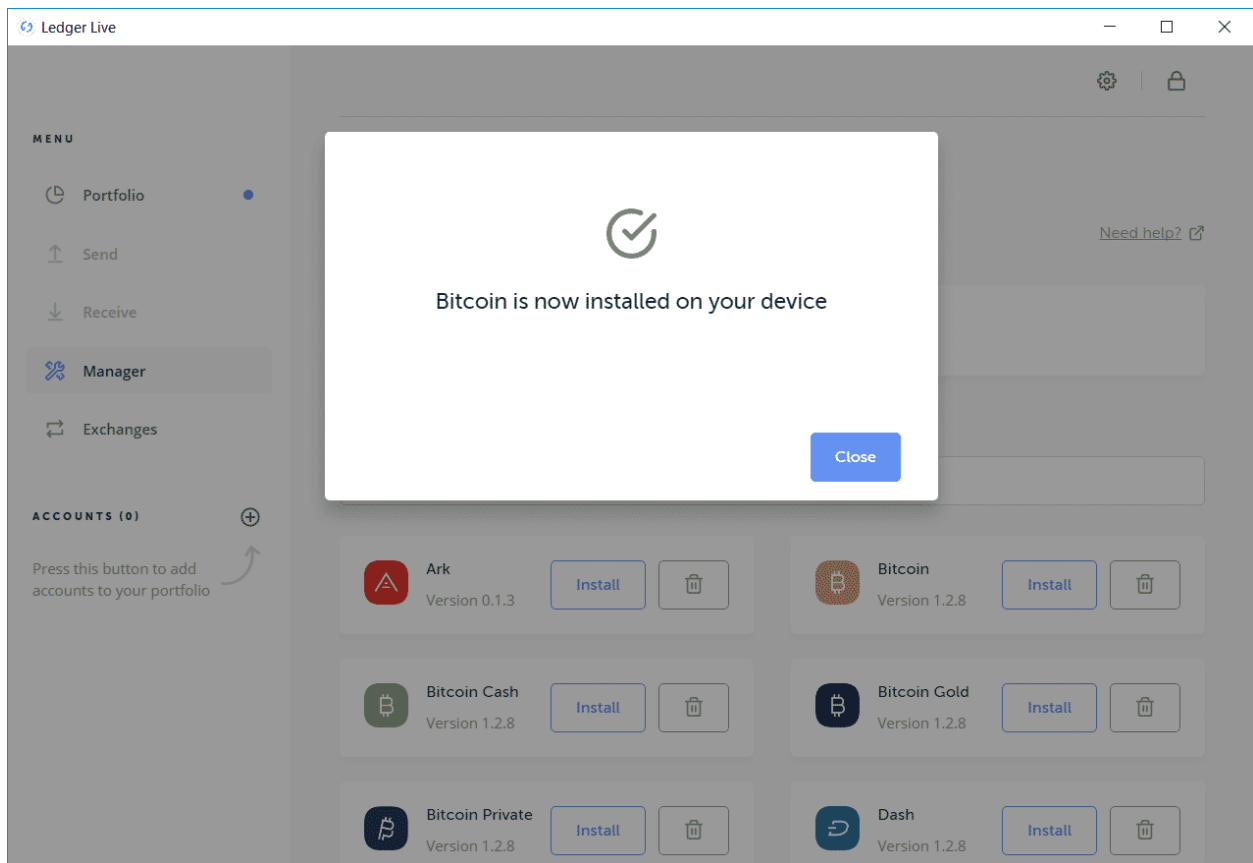

## 2. Ledger Live will start installing the Bitcoin App.

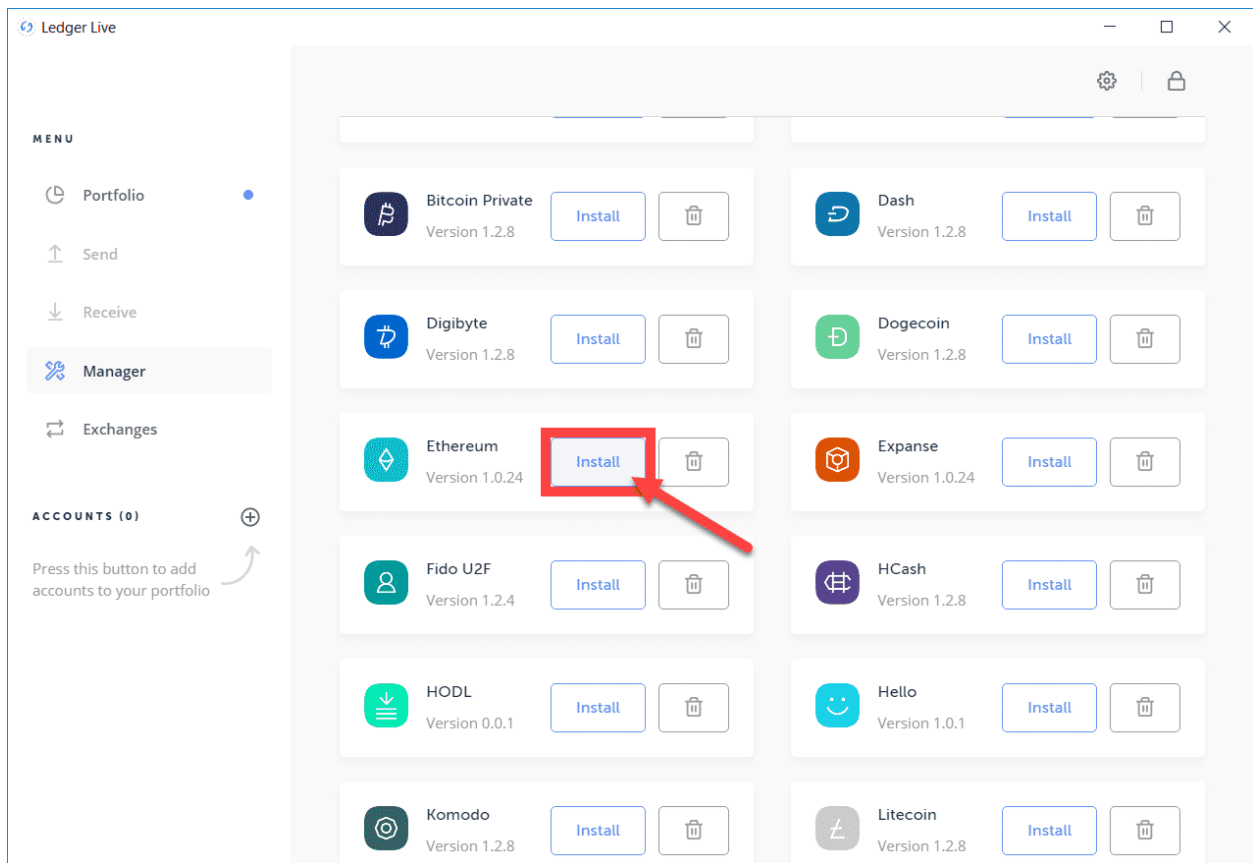

## 3. You will see the Bitcoin Icon on the ledger device when the app is installed.

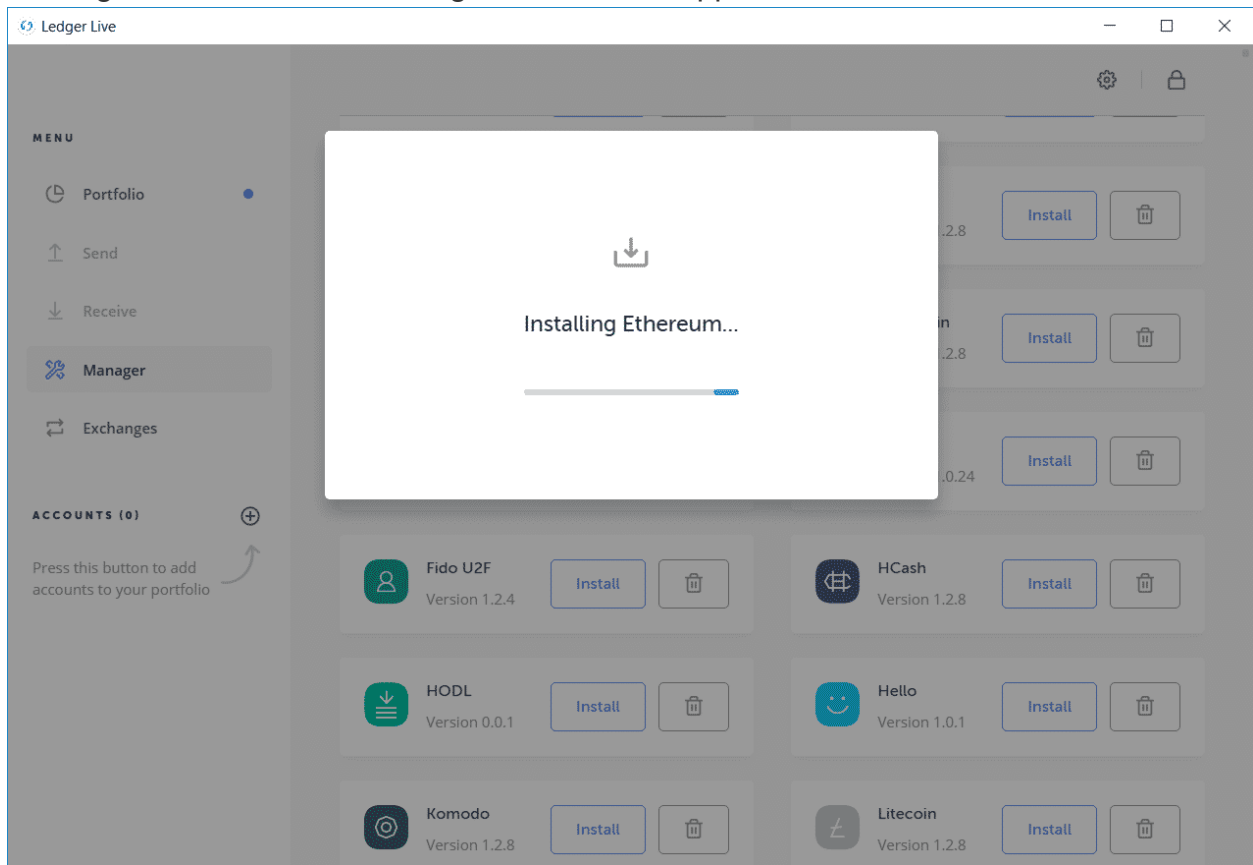

4. Ledger Live will also indicate that the Bitcoin app has been installed. Click “Close” to continue.

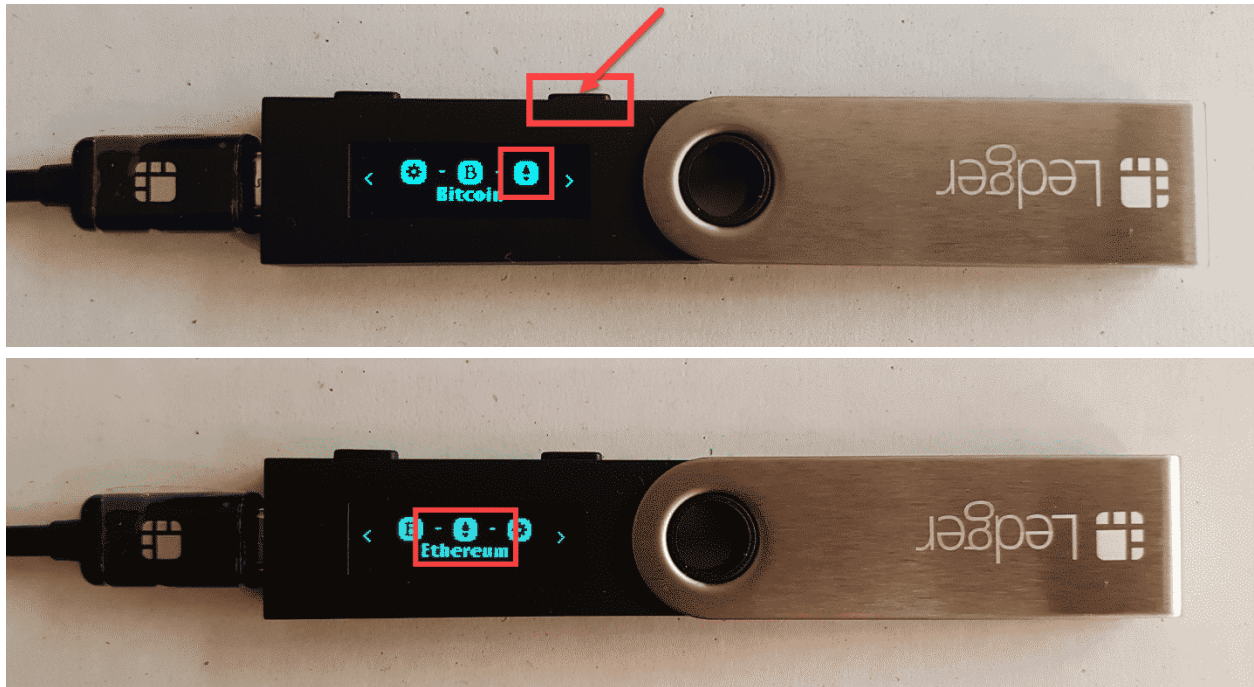

5. You will be returned to the Manager Screen. Scroll down to the Ethereum App and click “Install”.

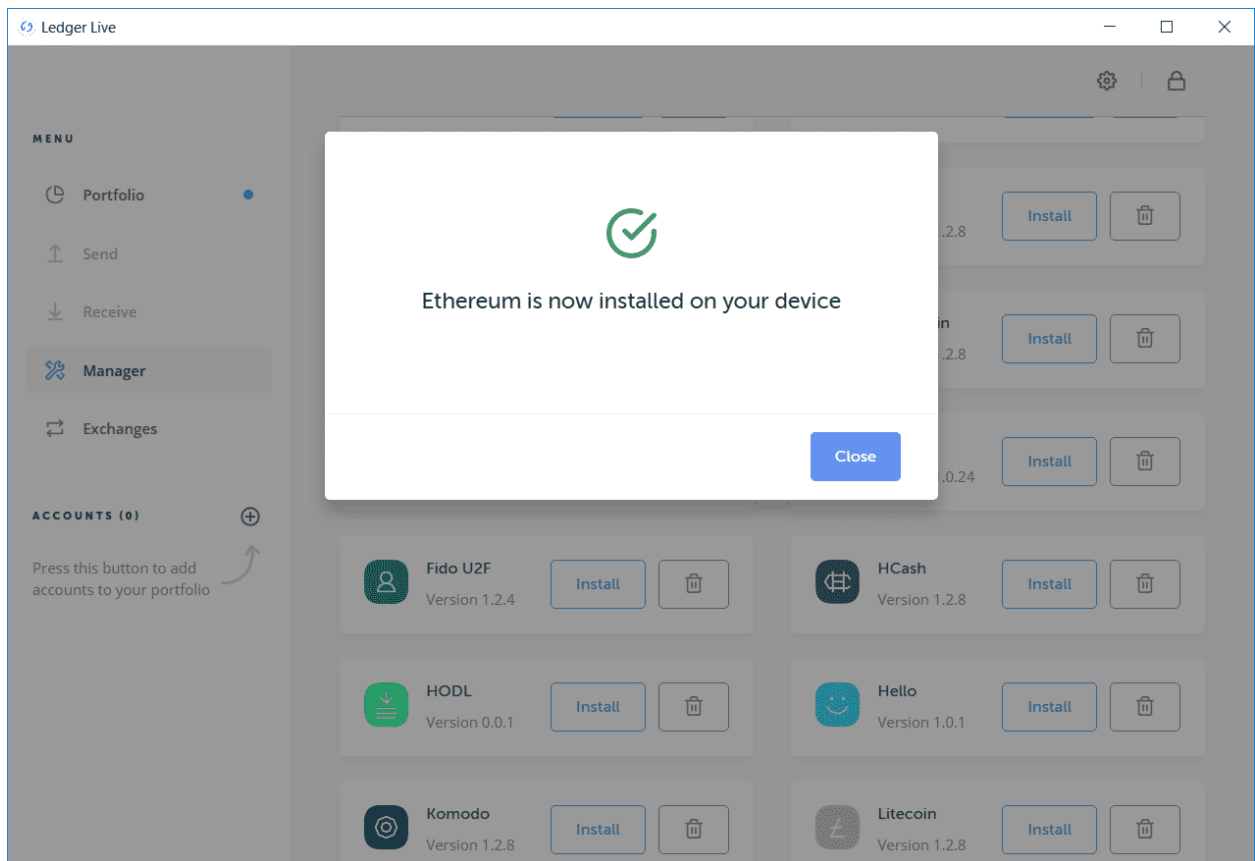

## 6. Ledger Live will start installing the Ethereum App.

7. You will see the Ethereum Icon on the ledger device when the app is installed. Press on the Right Button to scroll to the Ethereum App to confirm installation.

8. Ledger Live will also indicate that the Ethereum app has been installed. Click “Close” to continue.

You have installed the Bitcoin and Ethereum Apps on your Ledger Nano S. Please click on the “COMPLETE LESSON” button below to indicate that you have completed this lesson so you can go to the next lesson.
